

Last updated: 12 October 2022

Foreword

If you encounter any problems in the package, or have anything you would like to clarify, please contact us at terresquall.com/contact.

Table of Contents

1. Release Changelogs

- Version 1.3.1
- Version 1.3.0
- Version 1.2.0
- Version 1.1.0
- Version 1.0.1
- Version 1.0.0

2. Demo Scene

- a. First-Person Controls
- b. Going through doors
- c. Baked Lighting

3. Customising Assets

- a. AI Door
- b. Control Kiosk
- c. Scripts

4. Upgrading to HDRP or URP

- a. URP
- b. HDRP
- c. Fixing the Lighting
- d. Potential Problems

5. Troubleshooting

- a. Project window assets have no colour

6. Asset List

1. Version Changelogs

Version 1.3.1 (12 October 2022)

- Fixed a *Framerate was set to 0.00, it's been reset to 1.0.* bug that occurred when importing the package into Unity versions earlier than 2020.
- Updated the Android movement type controls in `DemoFirstPersonController` to be more intuitive, and added new documentation here on how to use it.
- Updated this document to reflect how to use the new `DemoFirstPersonController` properties in the Inspector.
- Hid the Canvas UI in the Scene view of the Demo scene, so that it doesn't become a distraction when viewing the Scene.

Version 1.3.0 (3 October 2022)

- **Re-exported certain models, so that the overall package size is reduced by some 180MB.** Certain models' material settings have also been updated.
- Removed unnecessary vertices from a few models.
- Fixed *Framerate was set to 0.00, it's been reset to 1.0.* bug that occurred occasionally when new prefabs were being made.

Version 1.2.0 (31 August 2022)

- **Converted more of the textures for the models, so that the overall package size is further reduced.** The materials that refer to these textures have also been updated.
- Fixed an issue with the Control Panel.FBX model (`/ScifiOffice/Meshes/Sci-Fi Environment/Control Panel.FBX`) that made it create warnings when the package is imported, due to some submeshes in the file sharing the same name.
- Updated the `Server Panel Variant` asset (`/ScifiOffice/Prefabs/Tech Accessories/Server Panel Variant.prefab`) so that it is an actual variant of the original prefab. The original prefab was the same as its parent.
- Updated `DemoFirstPersonController.cs` to support mobile controls. Take a look at the Demo scene (`/ScifiOffice/Scene/Demo.scene`) to see how this is set up.
- Assigned an appropriate material to the `Locker 1` (`/ScifiOffice/Meshes/Sci-Fi Environment/Locker 1.FBX`) mesh. It previously had no material assigned.

Version 1.1.0 (21 March 2022)

- **Compressed a lot of the textures, so that the overall package size is reduced by some 700MB.**
- Fixed a missing material on the Locker mesh (ScifiOffice > Meshes > Sci-Fi Environment > Locker 1).
- Fixed a material setting that was causing the Table Glass to not show up (ScifiOffice > Meshes > Office Interior > Drawer 2).
- Applied an unused material to a Chair prefab variant.
- Created a new fabric material using previously unused textures.
- Added some extra detail to the Concrete material and prefabs.
- Fixed a shader error associated with the Marble material.
- Added some extra detail to the doors.
- Added some detail to metal materials in the pack.
- Created a new Prefab for a previously unused set of textures (Desk Table Brown Plastic Variant).

- Created new Prefabs for a previously unused set of textures (20m Dark Carpet Ground, 4m Dark Carpet Ground).
- Added some detail to the Bookshelf models.
- Fixed some typos in this guide.

Version 1.0.1 (17 May 2021)

- Added a skybox to the scene.
- Updated the `DemoDoor.cs` and `DemoFirstPersonController.cs` scripts to use a package namespace, to prevent the occurrence of namespace conflict with other scripts in a project.
- Updated `DemoFirstPersonController.cs` with more customisable properties.
- Removed the log message for `DemoDoor.cs` when the door opens to reduce message clutter.
- Turned on shadows for light asset prefabs and increased range for them to make the Demo scene look better.

Version 1.0.0 (16 March 2021)

- Initial release.

2. Demo Scene

The Demo Scene can be loaded from the Scenes folder.

a. First-Person Controls

When you play the scene, by default, you can move around the scene with **W A S D**, and press **Ctrl** to crouch. When playing in the Editor, your mouse cursor may also be hidden. If this happens, press **Esc** to get your mouse cursor back.

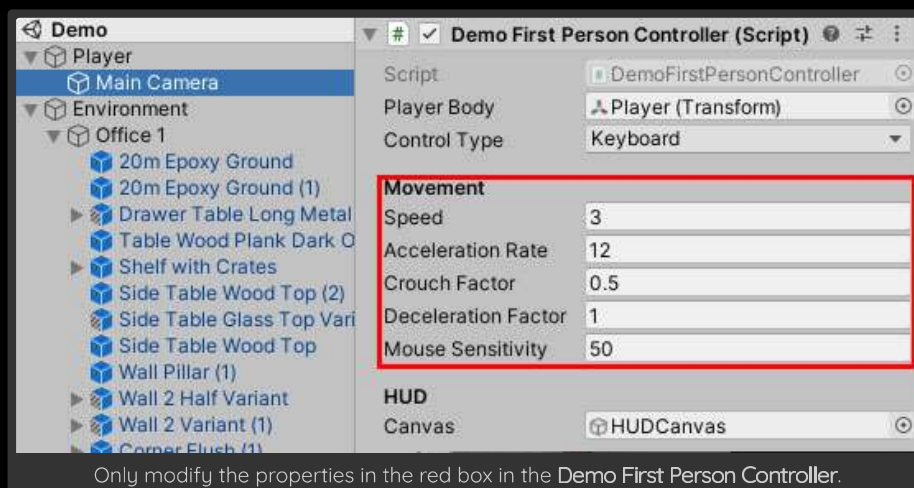

If you would like to use other control types, you can select the GameObject in Player > Main Camera, and modify the **Control Type** property in the **Demo First Person Controller** component. Here is how each of the control types work:

- **Keyboard (default):** Only able to move with keyboard using aforementioned keys.
- **Keyboard Mouse:** Keyboard controls, and ability to look around using the mouse.
- **Android:** For testing on mobiles using Unity Remote, or using the Unity Device Simulator. Shows a set of UI controls when playing for movement.

There are also a couple of variables you can adjust in the **Demo First Person Controller** component to tweak the movement properties of the controller. The table below gives more details.

Property	Description
Speed	Maximum speed of movement.
Acceleration	How long it takes to accelerate to maximum speed.
Crouch Factor	How much to crouch. Default is 0.5 (50%) of normal height.
Deceleration Factor	How fast do we go back to being stationary when we release the movement buttons? Default is 1, which is the same speed as acceleration.
Mouse Sensitivity	For Keyboard Mouse and Android movement only. Determines how quickly the camera turns when you move the mouse.

Do not modify the other variables from their default values.

b. Going through doors

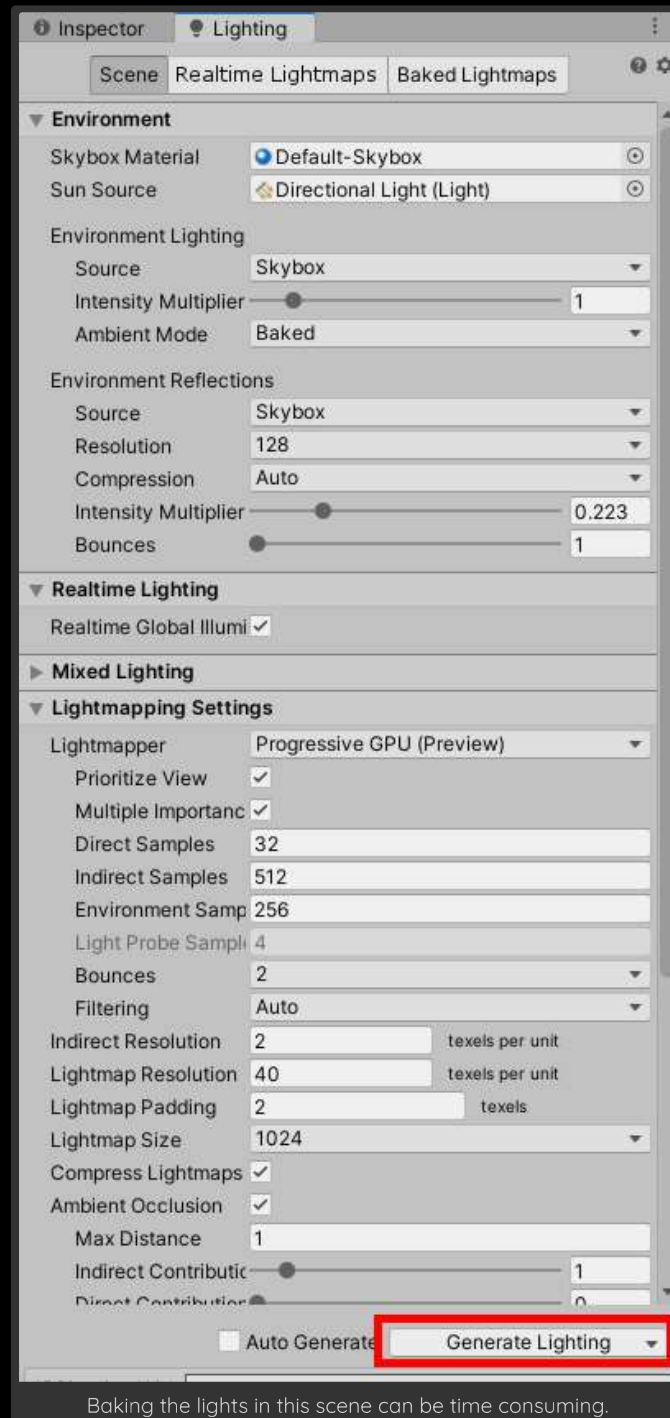

In play mode, doors will automatically open when you walk into them.

They come in 5 different colours.

c. Baked Lighting

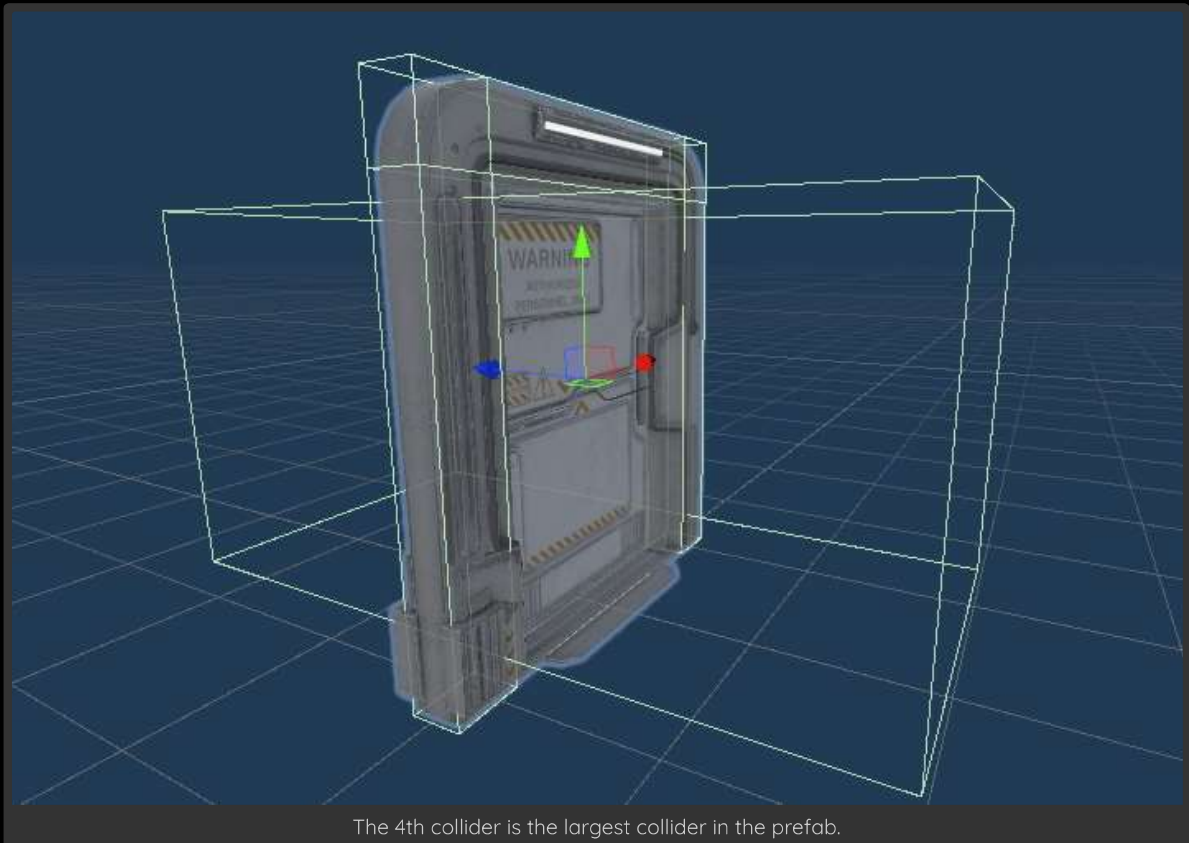

This scene contains baked lights. If you make any alterations to the scene and wish to update the lighting information, open the lighting window with **Window > Lighting**, and click “Generate Lighting”.

3. Customising assets

a. AI Door

There are a total of 4 box colliders on the parent prefab asset, with the 4th being a trigger for `DemoDoor.cs`.

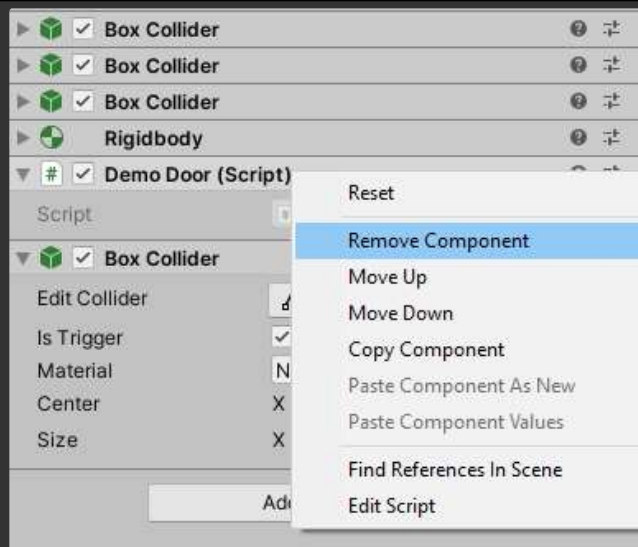

`DemoDoor.cs` triggers the Open Door animation when a collider with a “Player” tag touches it. The animations can be found in **Animations > Doors**.

There is 1 original prefab, AI Door Master, and 5 other prefab variants. Since the prefab variants derive most of their components from AI Door Master, any change you make on it would affect the other variants as well.

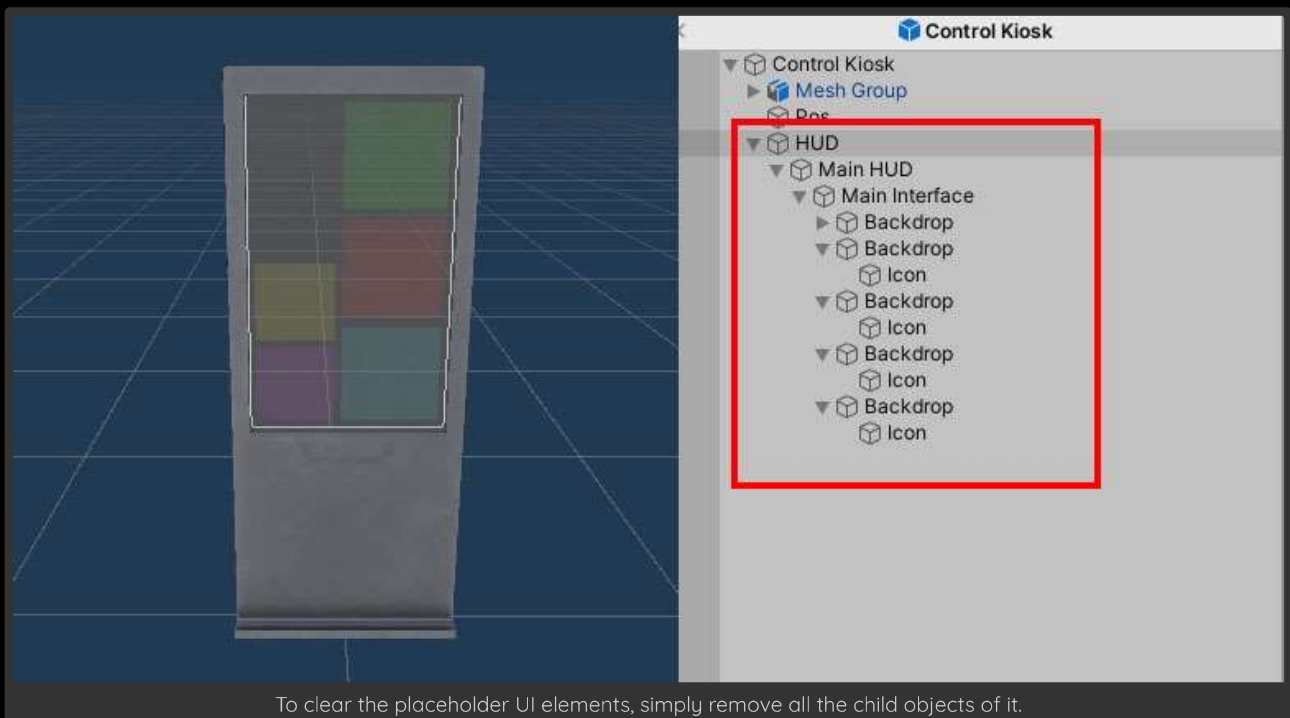

`DemoDoor.cs` is the script that handles the opening and closing of doors.

To remove the door opening feature used in the Demo scene, simply remove the Demo Door component from the Master Prefab.

b. Control Kiosk

The UI elements in the Control Kiosk game object are under the HUD game object (as a Canvas).

To clear the placeholder UI elements, simply remove all the child objects of it.

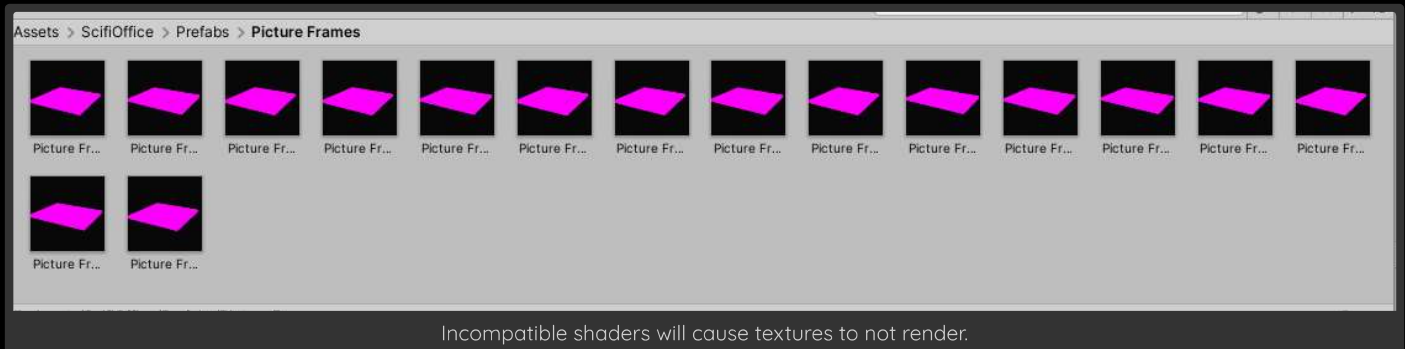

c. Scripts

Can be found in the Scripts folder.

- **DemoDoor.cs** - Triggers the open animation when an object with the "Player" tag enters a trigger collider in a Door.
- **DemoFirstPersonController.cs** - Simple First Person Controller for the demo scene.

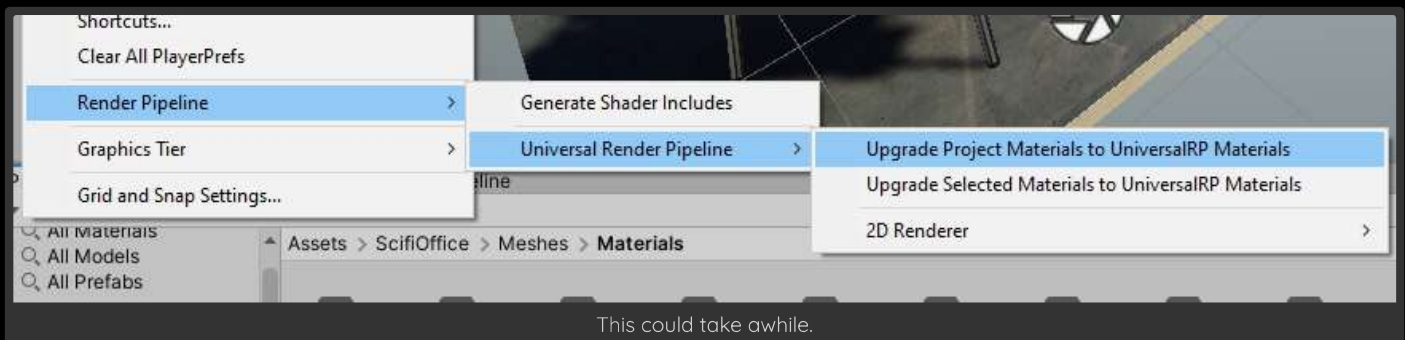

4. Upgrading to HDRP or URP

If you import this package into a project using the High Definition Render Pipeline (HDRP) or Universal Render Pipeline (URP), you will see that the shaders are incompatible. To fix this, you will need to convert all materials to HDRP or URP materials.

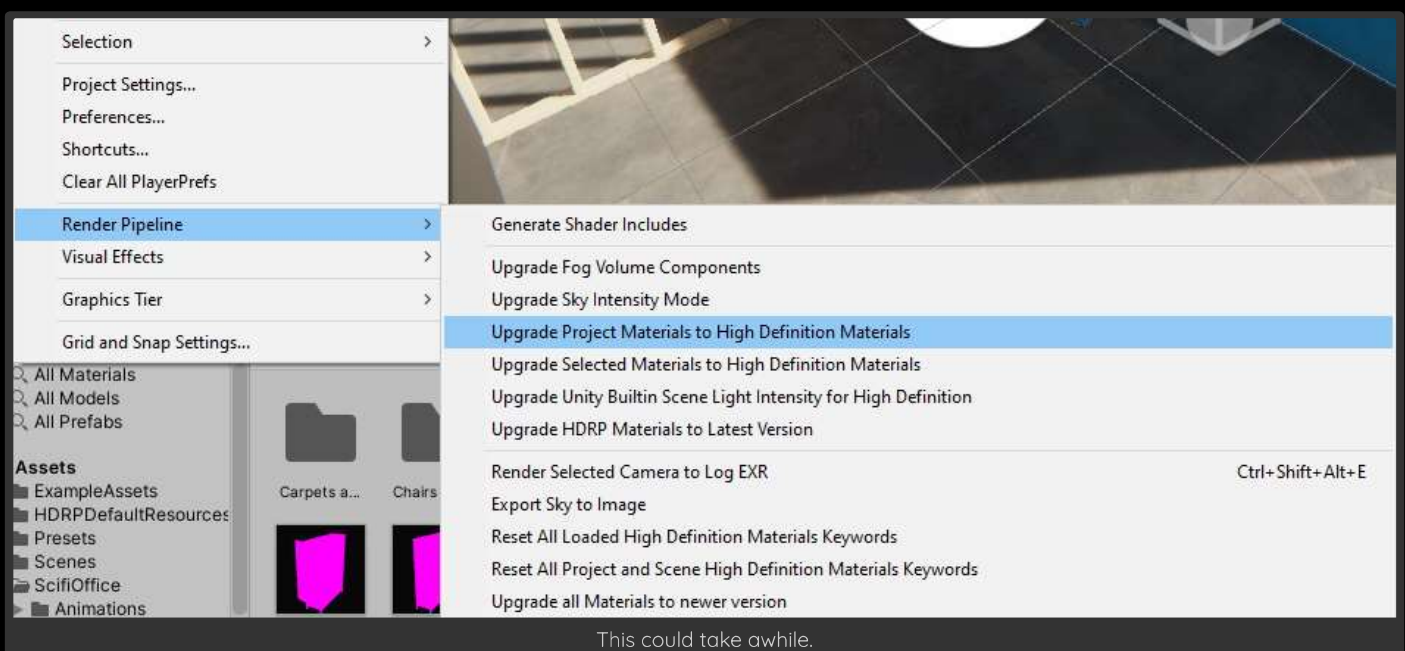

a. URP

In your Unity Project, go to **Edit > Render Pipeline > Universal Render Pipeline**. Then, select **Upgrade Project Materials to UniversalRP Materials** to UniversalRP Materials.

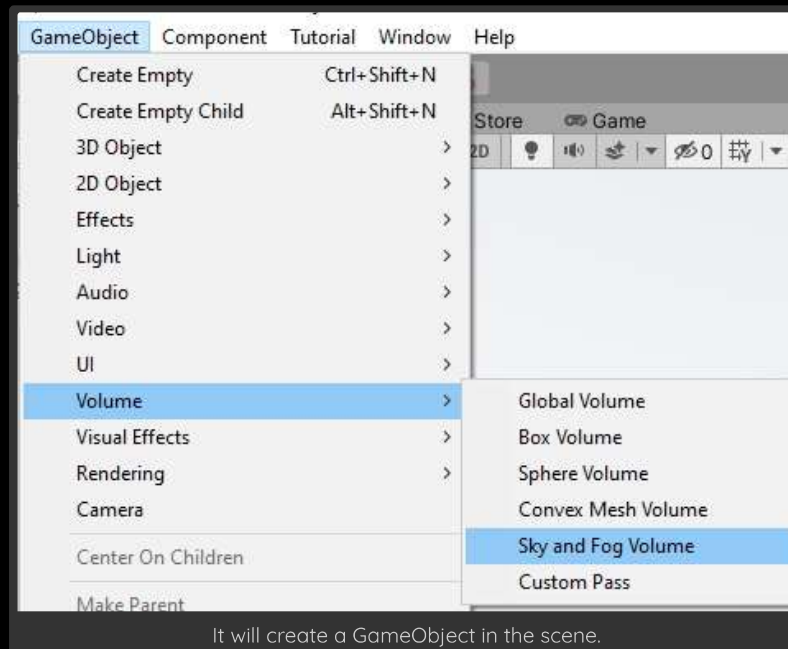

b. HDRP

In your Unity Project, go to **Edit > Render Pipeline**. Then, select **Upgrade Project Materials to High Definition Materials**.

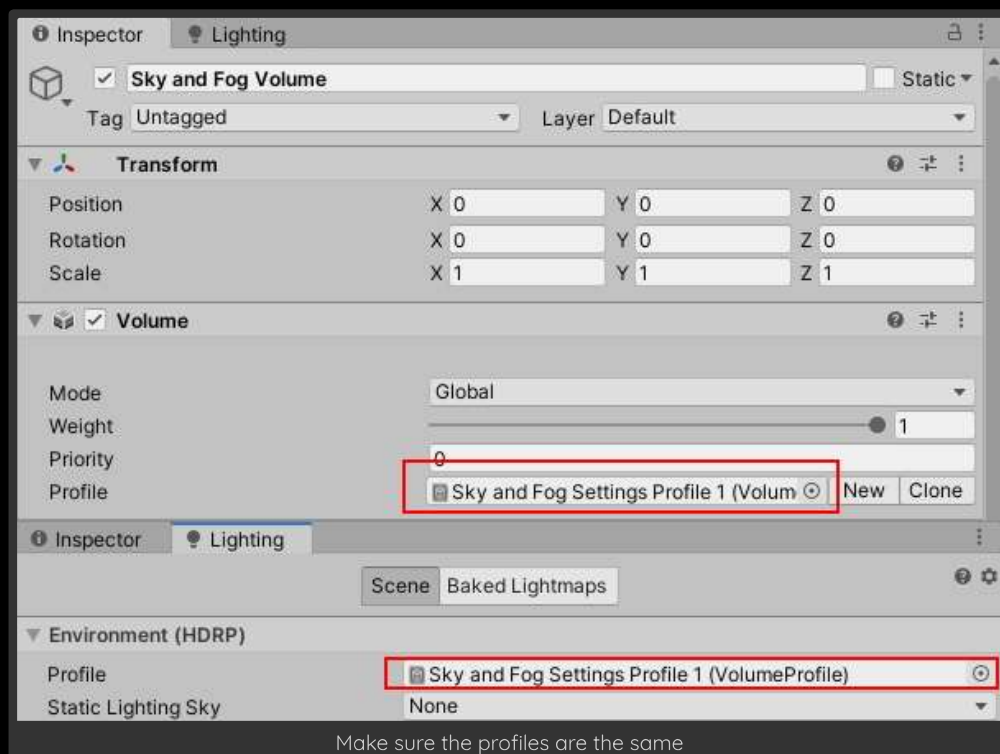

c. Fixing the Lighting

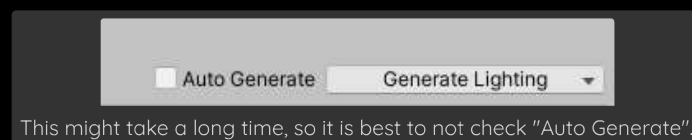

In the demo scene, add the default sky Volume to the demo scene from **GameObject → Volume → Sky and Fog Volume**.

In the Lighting window (**Window > Lighting**), make sure the profile is the same as the profile being used by your newly created sky and fog volume

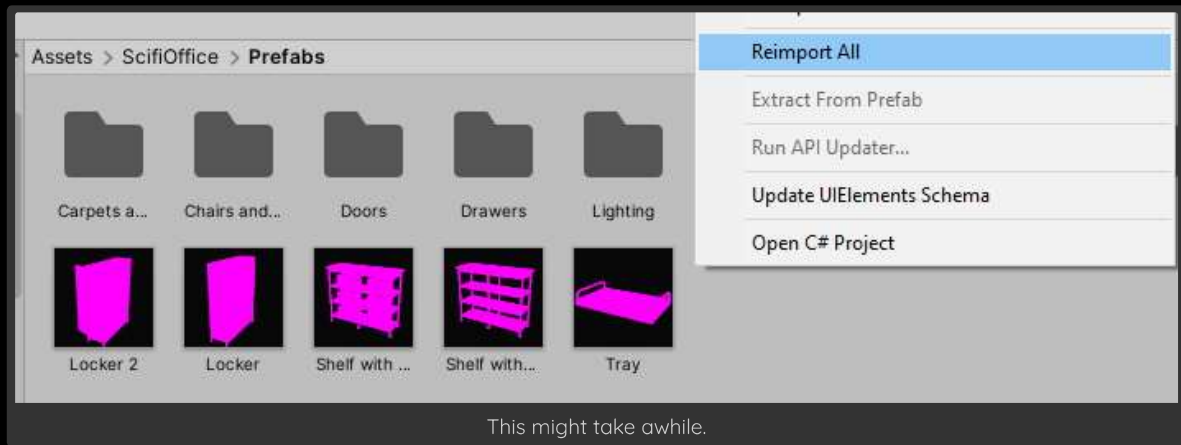

When everything is set up, bake the lights.

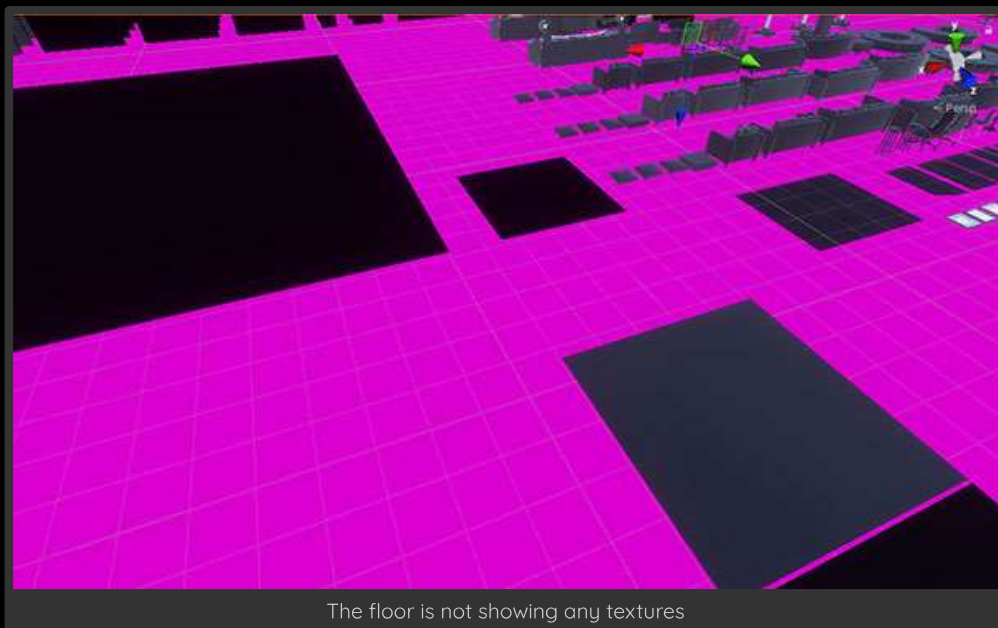

d. Potential Problems

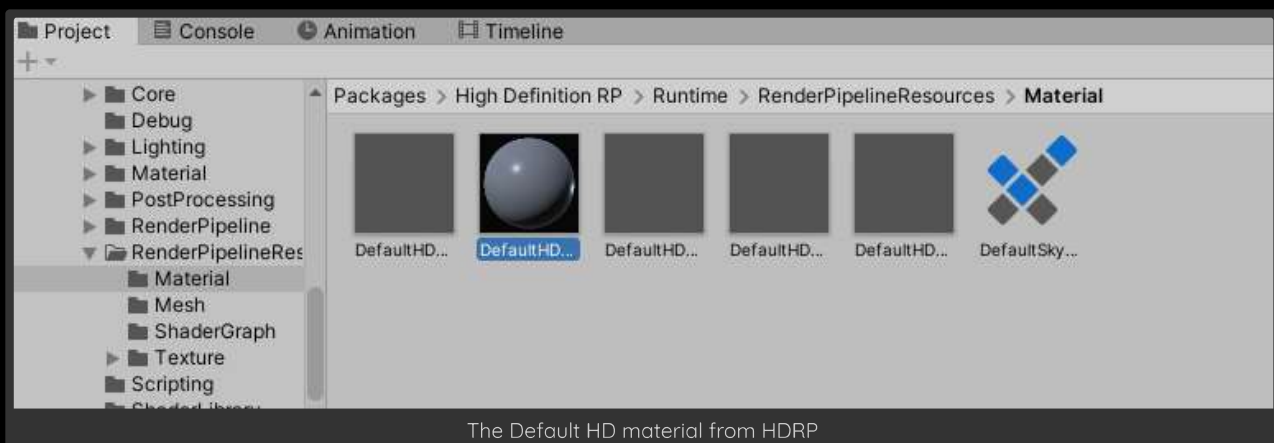

After upgrading to HDRP or URP, the preview thumbnails might still not reflect the changes. To fix this, right-click anywhere in the project view and click **Reimport All**.

In the Assets lineup scene, the floor might not render a texture as it is set to the built-in render pipeline's **Default-Material**.

Replace the floor with DefaultHDMaterial from `Library\PackageCache\com.unity.render-pipelines.high-definition@7.3.1\Runtime\RenderPipelineResources`

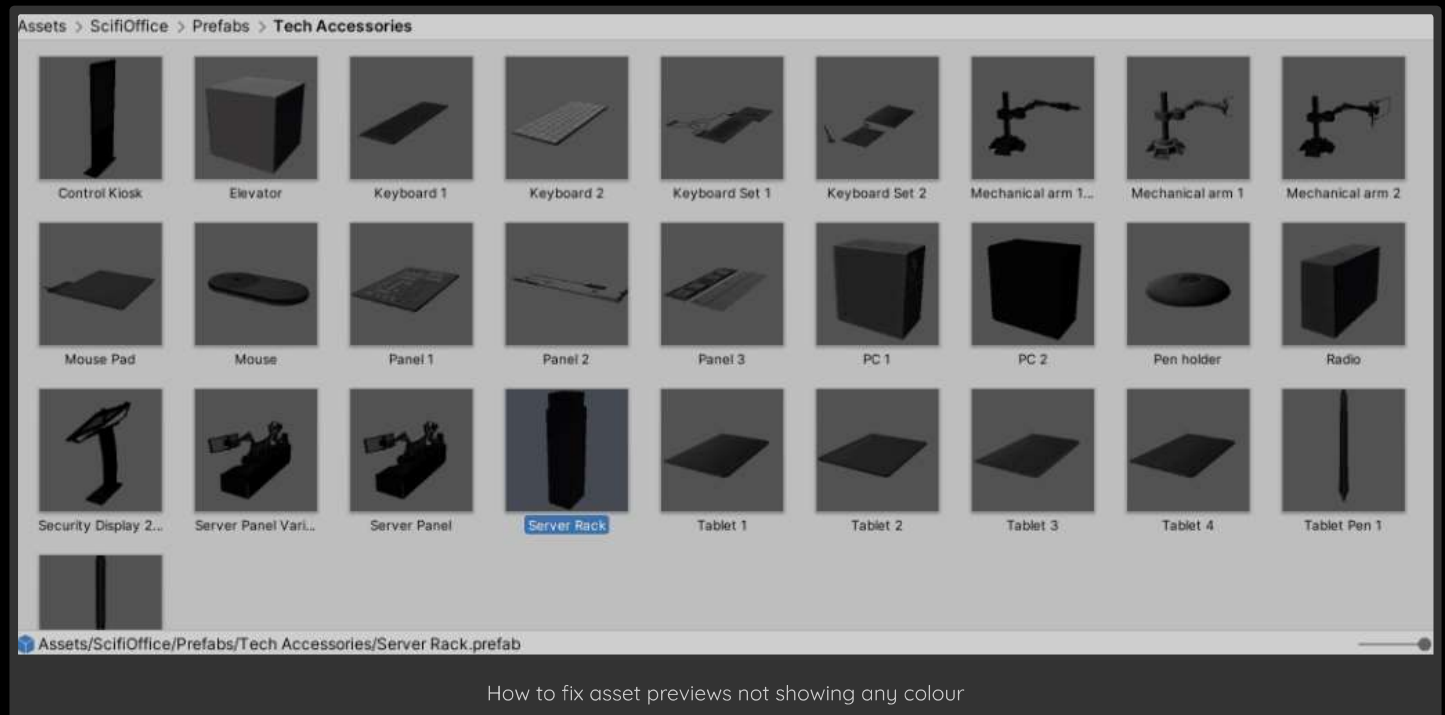

5. Troubleshooting

In this section, we will cover miscellaneous issues that you may run into when using the asset package.

a. Project window assets have no colour

After importing the package, if your assets appear without colour on the preview box in the Project window, you can do a **Right-click** → **Reimport** to get it to show up properly.

6. Asset List

Below is a list of all the assets in the package, as well as their respective polygon count and texture sizes.

Note: Assets with their names highlighted **green** are available in our free package.

S/N	Category	Asset Name	Polygon Count	Texture Size	Texture Maps
1	Carpets (24 assets)	Carpet 1.prefab	100	1024x1024	Albedo, Normal, Occlusion
		Carpet 2.prefab			
		Carpet 3.prefab			
		Carpet 4.prefab			
		Carpet 5.prefab			
		Carpet 6.prefab			
		Carpet 7.prefab			
		Carpet 8.prefab			
		Carpet 9.prefab			
		Carpet 10.prefab			
		Carpet 11.prefab			
		Carpet 12.prefab			
		Carpet 13.prefab			
		Carpet 14.prefab			
		20m Carpet Ground.prefab			
		20m Dark Carpet Ground.prefab (new!)			
		20m Concrete Ground.prefab			
		20m Epoxy Ground.prefab	512x512		
		20m Marble Ground.prefab			
		5m Carpet Ground.prefab	1024x1024		
		20m Dark Carpet Ground.prefab (new!)			
		5m Concrete Ground.prefab			
		5m Epoxy Ground.prefab			
		5m Marble Ground.prefab	512x512		
2	Chairs (8 assets)	Bar Stool.prefab	1832	2048x2048	Albedo, Normal, Metallic, Occlusion
		Bar Stool Variant.prefab			
		Chair.prefab	2580		
		Chair Variant.prefab			
		Office Chair.prefab	9126		
		Office Chair Variant.prefab			
		Stool.prefab	1168		
		Stool Variant.prefab			
3	Automated Doors (6 assets)	AI Door Blue.prefab	1578	2048x2048	Albedo, Normal, Metallic, Occlusion, Detail Mask, Emission
		AI Door Green.prefab			
		AI Door Red.prefab			
		AI Door Yellow.prefab			
		AI Door Master.prefab			
		Broken Door.prefab	1524		Albedo, Normal, Emission
4	Drawers (4 assets)	Drawer 2.prefab	752	2048x2048	Albedo, Metallic, Normal, Height, Occlusion
		Drawer 2 Oak Variant.prefab			
		Drawer 2 Metal Variant.prefab			

S/N	Category	Asset Name	Polygon Count	Texture Size	Texture Maps
		Drawer 2 Blue Plastic Variant.prefab			
5	Picture Frames (16 assets)	Picture Frame 1.prefab	124	4096x4096	Albedo
		Picture Frame 2.prefab			
		Picture Frame 3.prefab			
		Picture Frame 4.prefab			
		Picture Frame 5.prefab			
		Picture Frame 6.prefab			
		Picture Frame 7.prefab			
		Picture Frame 8.prefab			
		Picture Frame 9.prefab			
		Picture Frame 10.prefab			
		Picture Frame 11.prefab			
		Picture Frame 12.prefab			
		Picture Frame 13.prefab			
		Picture Frame 14.prefab			
		Picture Frame 15.prefab			
		Picture Frame 16.prefab			
6	Planks (15 assets)	Glass Plane 1m.prefab	12	2048x2048	Albedo, Metallic, Normal, Height, Occlusion
		Glass Plane 2m.prefab			
		Glass Plane 3m.prefab			
		Glass Plane Sub 1m.prefab	300		
		Glass Plane Sub 1.5m.prefab	20		
		Glass Plane Sub 2m.prefab			
		Table Wood Plank White Wood 1m.prefab	12		
		Table Wood Plank White Wood 2m.prefab			
		Table Wood Plank White Wood 3m.prefab			
		Table Wood Plank Dark Oak 1m.prefab			
		Table Wood Plank Dark Oak 2m.prefab			
		Table Wood Plank Dark Oak 3m.prefab			
		Table Wood Plank Grey Wood 1m.prefab			
		Table Wood Plank Grey Wood 2m.prefab			
		Table Wood Plank Grey Wood 3m.prefab			
7	Sofas and Cushions (36 assets)	Cushion 1.prefab	208	2048x2048	Albedo, Metallic, Normal, Height, Occlusion
		Cushion 2.prefab			
		Cushion 3.prefab			
		Cushion 4.prefab	968		
		Sofa 1.prefab	2420		
		Sofa 2.prefab	3596		
		Sofa 3.prefab	4980		
		Sofa 4.prefab	6368		
		Sofa 5.prefab	5460		
		Sofa 6.prefab	1520		
		Sofa 7.prefab	11104		
		Sofa 8.prefab	7536		
		Cushion 1 Blue Variant.prefab	208		
		Cushion 2 Blue Variant.prefab			
		Cushion 3 Blue Variant.prefab			

S/N	Category	Asset Name	Polygon Count	Texture Size	Texture Maps
		Cushion 4 Blue Variant.prefab	968		
		Sofa 1 Blue Variant.prefab	2420		
		Sofa 2 Blue Variant.prefab	3596		
		Sofa 3 Blue Variant.prefab	4980		
		Sofa 4 Blue Variant.prefab	6368		
		Sofa 5 Blue Variant.prefab	5460		
		Sofa 6 Blue Variant.prefab	1520		
		Sofa 7 Blue Variant.prefab	11104		
		Sofa 8 Blue Variant.prefab	7536		
		Cushion 1 Grey Brown Variant.prefab	208		
		Cushion 2 Grey Brown Variant.prefab			
		Cushion 3 Grey Brown Variant.prefab			
		Cushion 4 Grey Brown Variant.prefab	968		
		Sofa 1 Grey Brown Variant.prefab	2420		
		Sofa 2 Grey Brown Variant.prefab	3596		
		Sofa 3 Grey Brown Variant.prefab	4980		
		Sofa 4 Grey Brown Variant.prefab	6368		
		Sofa 5 Grey Brown Variant.prefab	5460		
		Sofa 6 Grey Brown Variant.prefab	1520		
		Sofa 7 Grey Brown Variant.prefab	11104		
		Sofa 8 Grey Brown Variant.prefab	7536		
8	Table Sets (6 assets)	Table Set 1 Oak Variant.prefab	9850	2048x2048	Albedo, Metallic, Normal, Height, Occlusion
		Table Set 1 White Wood Variant.prefab			
		Table Set 1 Blue Plastic Variant.prefab			
		Table Set 1 Metal Variant.prefab			
		Table Set 1 Grey Wood Variant.prefab			
		Table Set 1 Dark Oak.prefab			
9	Side Tables (6 assets)	Side Table Wood Top.prefab	488	2048x2048	Albedo, Metallic, Normal, Height, Occlusion
		Side Table Glass Top Variant.prefab			
		Rounded Side Table Wood Top.prefab	506		
		Rounded Side Table Glass Top Variant.prefab	770		
		Side Table Glass.prefab	1020		
		Rounded Side Table Glass Top with Props.prefab	3602		
10	Tables (37 assets)	Table Dark Oak.prefab	552	2048x2048	Albedo, Metallic, Normal, Height, Occlusion
		Table Blue Plastic Variant.prefab			
		Table Grey Wood Variant.prefab			
		Table Metal Variant.prefab			
		Table White Wood Variant.prefab			
		Table Oak Variant.prefab	1046		
		Drawer Table Short Dark Oak.prefab			
		Glassless Drawer Table Blue Plastic Variant.prefab			
		Drawer Table Short Grey Wood Variant.prefab			
		Drawer Table Metal Variant.prefab			
		Drawer Table Short White Wood Variant.prefab			

S/N	Category	Asset Name	Polygon Count	Texture Size	Texture Maps
